

Article 5 .12 OFF-STREET PARKING AND LOADING

5.12.2

2 Parking Lot/Driveway Surface: All parking areas, driveways and other areas serving 15 or more vehicles shall be paved with 2" of bituminous concrete or an equivalent surfacing, over a gravel base of at least 12" in thickness. 2" of bituminous concrete surface may be substituted with a minimum of 2" crushed gravel, reclaimed bituminous pavement or similar stable surface material if a case can be made that bituminous concrete is not warranted, and shall have appropriate bumper or wheel guards shall be placed where needed.

- a. **Seasonal Parking Lot Surfaces:** For seasonal parking areas or lots the 2" of bituminous concrete surface may be substituted with a minimum of 2" crushed gravel, reclaimed bituminous pavement or similar stable surface material.
(Amended November 2, 2010)
