VINEGAR HILL MUSIC THEATRE
53 Old Post Road Arundel, ME 04046

Dear Sarah,

I've designed the outdoor stage for Vinegar Hill using off the shelf, structurally engineered ring and pin scaffold, an industry standard building material for staging in both construction and entertainment fields. I have sourced the scaffold system from Scaffold Depot and have included the engineering information for each component.

As an added measure of safety I have also specified there to be a minimum of four 1000lb concrete blocks placed around the perimeter of the structure with 3500lb straps attached to the upper most tie points on the structure to aid in preventing any movement of the structure from excessive wind.

I have also devised a Severe Weather Action Plan to keep any performers or patrons out of the way of harm.

Please let me know if you have any questions.

Jack
